People always ask

what AUGI stands for

Agility Utility Ground-breaking
Intelligent design

AUGI Sports was founded in 2014 by a group of four engineers with over 30 years of motorcycle boot design and manufacturing experience. Prior to founding AUGI Sports, the design and manufacturing staff worked with some of the leading brands in the world for motorcycle boot design. Using this experience and the partnership with a motorcycle boots factory, AUGI Sports was born to utilize this experience and unique factory relationship to introduce their own brand of boots that feature innovative designs, materials and unsurpassed quality and value. Headquartered in USA, AUGI Sports is quickly expanding with several sales partners in different countries in the world. In July 2019, AUGI SPORTS AUSTRALIA was established through merging USA headquarter and thus formally introducing AUGI SPORTS in to Australia.

AUGI Sports also utilizes several professional riders to evaluate their product and provide feedback which is utilized in the boot design in a constant quest to improve the products. This is also strengthened through our four main design principles, Agility, Utility, Ground-breaking engineering technology, and Intelligent design. In the future, sponsorship is planned in MotoGP, FIM Motocross, AMA Supercross series to showcase the quality and performance advantage that is designed into every AUGI sports product.

AUGI Sports goal is to continue its upward trajectory to produce the world's best motorcycle boots and become the world's most respected and recognized brands in the world of motorcycle boots.
